EXPERIENCE

Software Engineer / Project Lead Engineer at MEV LLC, Cherkasy, Ukraine **2017 Present**

Highlights:

- Designed and led engineering on multiple integrations such as Magento (v1 & 2), Facebook Messenger, Salesforce Service Cloud, Shipstation, Gorgias and Zendesk Chat for our client's customer support product, allowing them to make contracts with >25m\$ companies.
- Built support tickets real-time filtering mechanism for our client's customer support product, which reduced workload for administration staff by 30%.
- Re-engineered post-survey module with customizable chat and email support for our client's customer support product, increasing customer satisfaction rate.
- Designed and built real-time notifications and messaging subsystem for our client's social network product.
- As second developer took part in developing back-end service for our client's social network product from estimating at the start to stress testing and production release at the very end, meeting all deadlines and client's expectations.
- Took engineering initiative to propose and implement refactoring of 20-steps job pipeline for our marketing system product, which allowed to easily trace and debug errors and increased overall pipeline stability.

Project lead engineer responsibilities:

- Helping PM in managing a team of 5 people (1 QA, 1 automation QA, 3 developers).
- Assuring delivered code quality by doing code reviews, task analysis, technical decision making.
- Doing employee review for tech part of the team.
- Serving as the main bridge in communication between US and Ukrainian parts of development team.
- Doing requirement analysis, finding inconsistencies and proposing changes or improvements.
- Maintaining project management boards and documentation.

Software Engineer at Active Bridge LLC, Cherkasy, Ukraine **2016 2016**

Highlights:

- Planned and implemented code refactoring for controller-level code on one of the company's products.
- Brought up one trainee up to junior-level Ruby developer.
- Configured VPS on Digitalocean for one of company's products.

Jr. Software Engineer at InterLink LLC, Cherkasy, Ukraine **2015 2016**
